MESSAGE FROM THE

**EXECUTIVE  
DIRECTOR**

**BENJAMIN BOAKYE**

The year 2025 has been one of reflection, resilience, and renewed purpose for the Africa Centre for Energy Policy (ACEP). As Africa continues to navigate the complexities of energy security, climate change, and economic transformation, our commitment to evidence-based advocacy and accountable resource governance has remained steadfast. This year, the global energy transition agenda gained further momentum, bringing both opportunities and difficult trade-offs for resource-rich countries. At ACEP, we intensified our efforts to ensure that policy decisions in the oil, gas, mining, and renewable energy sectors are guided by transparency, fiscal prudence, and long-term national interest. Our research and policy engagement focused on strengthening public financial management in the extractive sector, advancing methane emissions accountability, and deepening conversations around a just and inclusive energy transition.

A major highlight of the year was our series of strategic publications examining climate action, downstream petroleum product taxation, and the persistent energy sector debt challenge.

Our work assessed Ghana's preparedness to meet its climate commitments, identifying institutional and financing gaps critical to delivering a credible transition pathway. We further analyzed downstream petroleum taxation and its implications for domestic revenue mobilization, consumer welfare, and macroeconomic stability. Perhaps most significantly, our research interrogated the structural drivers of energy sector debt and its relationship with Ghana's broader debt sustainability outlook. By drawing clear linkages between fiscal governance decisions in the energy sector and national economic stability, we contributed evidence to ongoing reforms aimed at strengthening transparency, enhancing public financial management, and safeguarding long-term fiscal resilience.

*At ACEP, we remain committed to this task by promoting policies that ensure Africa's natural resources are managed responsibly, its energy transition is just and equitable, and its development pathway is sustainable and inclusive.*

Beyond research, we expanded our citizen and youth engagement platforms, recognizing that sustainable reform is anchored in an informed and empowered people. Through the Climate Academy, the NextGen Leaders Program, and strategic convenings such as the Future of Energy Conference, we continued to build a new generation of policy-conscious leaders equipped to demand accountability and champion transformative development.

As we look ahead, we acknowledge that

the task of ensuring that Africa's natural resources drive economic transformation and sustainable inclusive development requires deep commitment, strong collaboration, sustained advocacy and effective partnerships among governments, development partners, civil society organizations and academia. At ACEP, we remain committed to this task by promoting policies that ensure Africa's natural resources are managed responsibly, its energy transition is just and equitable, and its development pathway is sustainable and inclusive.

Our work this year would not have been possible without the dedication of our staff, the collaboration of our partners, the engagement of policymakers, and the trust of the communities we serve. Together, we have demonstrated that credible research, strategic advocacy, and collective action can influence policy and strengthen governance systems. We thank you for your continued partnership and support.

02

# ABOUT US

AFRICA CENTRE FOR  
ENERGY POLICY

# ABOUT AFRICA CENTRE FOR ENERGY POLICY

The Africa Centre for Energy Policy (ACEP) is a leading policy research and advocacy organization dedicated to advancing transparency, accountability, and sustainable development in Africa's energy, extractive, and environmental sectors. Although ACEP operates regionally across Africa, it has its headquarters in Accra, Ghana. At ACEP, we work to influence policy reforms, strengthen institutions, and empower citizens to ensure that natural resource wealth delivers equitable and long-term benefits for all through evidence-based research and public interest advocacy. As a think-tank ACEP conducts rigorous policy analysis, produces credible data, and engages policymakers, civil society, the private sector, and the media to shape reforms in energy governance across the region. Our work spans oil and gas governance, mining sector accountability, renewable energy and energy transition, climate policy, and broader natural resource management.

We play a critical role in promoting fiscal transparency, responsible resource management, environmental sustainability, and inclusive development. Through strategic convenings, capacity-building programs, and citizen engagement initiatives, we strengthen public oversight and support democratic participation in energy and extractive sector decision-making. As Africa navigates the global energy transition and the growing urgency of climate action, we remain committed to championing policies that balance economic development with environmental responsibility. Our Centre continue to position itself as a trusted voice in shaping just and equitable energy transitions that safeguard national interests while advancing sustainable growth across the region.

## OUR VISION

An Africa in which energy and extractive resources are utilized for economic transformation and sustainable inclusive development.

## OUR MISSION

Our mission is to conduct evidence-based research, policy analysis, capacity development and advocacy to ensure effective and equitable utilization of energy and extractive resources in Africa.

# OUR CORE VALUES

## PROFESSIONALISM

We uphold high ethical standards in the performance of our core mandates. Our work is guided by the standards of accuracy, evidence-based positions, and objective analysis of issues.

## KNOWLEDGE

We are keen on knowledge creation, knowledge sharing and expertise development in the energy and extractive sector.

## COOPERATION

We value and foster partnerships, networks, and strategic collaborations with all stakeholders to deliver value.

## INDEPENDENCE

We conduct our activities on a non-partisan basis and without influence from other interest groups.

## ACCOUNTABILITY

We are committed to the interest of the citizenry in the performance of our duties.

## INTEGRITY

We believe in building trust and credibility as a reliable authority in the energy and extractive sector.

**03**

OUR APPROACH TO

**DELIVERING  
CHANGE**

 **ADVOCACY**

ACEP optimizes its partnerships with strong and strategic CSOs, to build constructive external pressure at both national, sub-regional, regional, and at the international level on governance reforms in the energy and extractive sectors. We also amplify the voices of grass root organizations and institutions representing marginalized groups by strengthening their capacity to advocate, avail ACEP's advocacy platforms to them. ACEP has over the years made deliberate efforts to create policy space and platforms to broker dialogue, learning, and sharing between supply and demand side actors in the energy and extractive governance space for innovative solutions to address the structural challenges in the energy and extractive sectors through convening stakeholder engagements, exchange program with other CSOs across the region, and annual conferences.

 **EVIDENCE-BASED RESEARCH**

ACEP generates strong and compelling evidence that influences government action on reforms, facilitates progressive discussions for innovative solutions, and strengthens citizens' voice and demand for transformative reforms.

 **COLLABORATION**

Ensuring the change we want requires active collaboration among civil society, academia, governments, media, regional and subregional bodies, think tanks, grassroots organizations, businesses, and local communities. ACEP collaborates with all these actors to ensure harmonious policy development. We also pay particular attention to grassroots organizations and organizations representing marginalized groups by availing to them our platforms and networks to influence change.

 **CAPACITY DEVELOPMENT**

The Centre is committed to institutional capacity development in the energy and extractive sector through its capacity building and training programmes. These programs have strengthened the capacity of civil society actors, media, young Africans, government across the region among others.

04

OUR

**PROGRAMS**

ACEP's work is focused on five thematic areas with five outcome areas:

 **Revenue  
Governance**

 **Contract  
Governance**

 **Institutional  
Development  
and Corporate  
Transparency**

 **Diversity,  
Equity, and  
Inclusion in  
Resource  
Governance**

 **Climate Change  
and Energy  
Transition**

## OUR PROGRAMS

# REVENUE GOVERNANCE

The benefits of strong resource governance in Africa cannot be overstated. The task of ensuring that natural resource wealth translates into broad-based economic transformation and sustainable, inclusive development depends largely on how effectively these resources are governed.

The governance of natural resources is critical to the socio-economic development of resource-rich nations across the continent. When managed effectively, natural resources can serve as a powerful engine for growth, driving industrialization, job creation, infrastructure development, and improved public service delivery. Sound resource governance ensures that the production, management, and utilization of these resources generate optimal value for citizens, while minimizing the risks of mismanagement, corruption, revenue leakages, and environmental degradation.

In the absence of strong governance frameworks, however, many countries face the well-documented “resource curse,” where resource abundance paradoxically leads to weak institutions, economic volatility, and limited development outcomes. This underscores the need for transparency, accountability, and robust institutional mechanisms to guide the sector.

Despite some gains across the region, challenges remain. Concerns persist around the equitable allocation and utilization of natural resource revenues. Going forward, strengthening enforcement mechanisms, enhancing citizen participation, and deepening institutional accountability will be critical to consolidating the gains from Africa’s extractives sector ensuring that resource revenues are strategically invested in ways that promote inclusive growth and intergenerational equity remains central to achieving Africa’s broader development objectives.

The primary objective of this workstream is to strengthen initiatives in the natural resource sector, promoting effective resource revenue governance to tackle challenges related to poverty, environmental degradation, and inequitable distribution of resource revenues, beneficial ownership disclosures, expose corruption and tax evasion, and curb illicit financial flows in the extractive sector. The workstream’s efforts are specifically hinged on three key areas of revenue governance:

- Petroleum Revenue Management
- Mineral Revenue Management
- Fiscal Governance and Domestic Resource Mobilization

# REVENUE GOVERNANCE

## KEY HIGHLIGHTS 2025

### **PETROLEUM REVENUE ACCOUNTABILITY**

ACEP's study exposing mismanagement of petroleum revenue led to formal criminal prosecution by the Office of the Special Prosecutor (OSP) against the former CEO and eight others in the management of the Unified Petroleum Pricing Fund.

### **SOCIAL FUND ALLOCATION REFORM**

Advocated successfully for the repeal of the Earmarked Funds Capping and Realignment Act, enabling increased allocations to social programmes through GETFund and NHIL.

### **INDUSTRIAL MINERALS AWARENESS**

Strengthened media understanding of Ghana's industrial minerals and their economic potential, enhancing public awareness and scrutiny.

### **MIIF LEGISLATIVE REFORM**

Contributed to amendments of the MIIF Act to redirect mineral revenues away from non-productive investments.

### **PARLIAMENTARY BUDGET OVERSIGHT**

Participated in the Parliamentary Select Committee of Mines and Energy budget review and approval processes for energy sector agencies.

### **MARINE FUEL SUBSIDY WITHDRAWAL**

Advocacy efforts led to the withdrawal of Marine Gasoil (MGO) subsidies, helping curb fuel smuggling.

## OUR PROGRAMS

# CONTRACT GOVERNANCE

Contract governance is a critical area of focus for countries, particularly resource-rich economies. The task of ensuring that natural resource wealth delivers tangible and lasting benefits to citizens begins with how contracts are designed, negotiated, and implemented. Effective contract governance ensures that agreements between governments and investors are transparent, equitable, and aligned with long-term national development priorities.

Given that natural resources are held in trust by governments on behalf of citizens, it is essential that every stage of the extractive value chain, from exploration to production is guided by contracts that safeguard the public interest. Well-structured agreements should not only secure fair financial returns but also promote local content development, environmental sustainability, technology transfer, and long-term economic resilience.

Contracts in the extractive sector define critical elements such as licensing terms, production rights, revenue-sharing arrangements, fiscal obligations, stabilization clauses, and environmental and social responsibilities. When these agreements are poorly negotiated or weakly enforced, the consequences can be significant ranging from substantial revenue losses and tax avoidance to environmental degradation, community conflicts, and widespread public dissatisfaction. In many cases, such outcomes undermine trust in institutions and weaken the overall governance framework of the sector.

ACEP plays a leading role in strengthening contract governance across the extractive sector through rigorous policy research, technical analysis, and evidence-based advocacy. We help to identify gaps, risks, and opportunities for reform by scrutinizing existing contracts, fiscal regimes, and regulatory frameworks.

Through its work, ACEP supports governments and stakeholders to improve negotiation capacity, ensuring that contracts are structured to maximize national benefits while maintaining investor confidence. The organization also promotes transparency by advocating for the public disclosure of contracts and simplifying complex agreements into accessible formats that empower citizens to engage meaningfully in resource governance discussions.

# CONTRACT GOVERNANCE

## KEY HIGHLIGHTS 2025

### PPA RENEGOTIATION & DEBT SAVINGS

Chaired a technical committee renegotiating PPAs and debt obligations, yielding significant savings to the state in Ghana.

### PSP LEASE MODEL REFORM

Recommended the adoption of a multiple lease model for PSP, which was subsequently implemented by the government.

### GNPC ACQUISITION OVERSIGHT

Mobilized civil society to scrutinize GNPC's proposed acquisition of Springfield's interests.

### TARIFF ACCOUNTABILITY

Interrogated tariff proposals submitted by utilities during PURC public hearings, ensuring fair pricing in Ghana.

### REGIONAL CONTRACTING CAPACITY BUILDING

Strengthened capacity of state and non-state actors in Liberia and Sierra Leone on contracting terms, promoting compliance and accountability.

# OUR PROGRAMS

# CORPORATE TRANSPARENCY

# AND INSTITUTIONAL

# DEVELOPMENT

At the Africa Centre for Energy Policy (ACEP), we recognize the pivotal role that effective corporate governance and strong institutional development play in driving sustainable growth and economic resilience, particularly within Africa's resource-rich sectors. While the continent is abundantly endowed with natural resources that are critical to development, translating this wealth into tangible and lasting benefits for citizens remains an ongoing challenge.

In recent years, global efforts to diversify energy sources and transition toward cleaner, more sustainable systems have intensified, driven by the urgent need to address climate change and reduce dependence on fossil fuels. Africa is uniquely positioned within this transition. The continent holds an estimated 60% of the world's solar potential and vast renewable energy resources that could power industrialization, expand energy access, and support green growth pathways. Yet, despite these significant endowments, these opportunities have not fully translated into sustained economic transformation and inclusive development.

Strong governance frameworks are essential for ensuring transparency, accountability, and efficiency in how resources are managed, while robust institutions provide the structure and capacity needed to implement policies, enforce regulations, and deliver results. At ACEP, our work is grounded in strengthening this intersection. We advance evidence-based research, policy advocacy, and stakeholder engagement aimed at improving governance outcomes across the energy and extractive sectors. We emphasize the importance of sound corporate governance practices such as transparency in decision-making, accountability in leadership, and adherence to regulatory standards particularly among state-owned enterprises and key industry actors.

Establishing and strengthening robust institutional frameworks creates an enabling environment for responsible and sustainable resource management. It supports long-term planning, reduces vulnerabilities to external shocks, and ensures that resource wealth is invested in ways that generate broad-based benefits, including job creation, infrastructure development, and improved social outcomes.

# CORPORATE TRANSPARENCY AND INSTITUTIONAL DEVELOPMENT

## KEY HIGHLIGHTS 2025

### **NPA BILL POLICY RECOMMENDATIONS**

Submitted recommendations on the draft NPA Bill informed by ACEP's investigations and research.

### **CONSTITUTIONAL REVIEW CONTRIBUTIONS**

Provided inputs on natural resource governance for the constitutional review process.

### **DOWNSTREAM POLICY REFORM ENGAGEMENT**

Contributed to technical deliberations on petroleum downstream policy reforms.

### **MEDIA CAPACITY STRENGTHENING**

Enhanced media capacity on natural resource governance, improving coverage of ACEP's outputs.

### **CIVIL SOCIETY RESILIENCE SUPPORT**

Continued supporting civil society to strengthen their resilience.

### **DIGITAL BENEFICIAL OWNERSHIP REGISTER DEVELOPMENT**

Supported the creation of an online Beneficial Ownership (BO) register portal in Liberia, with launch planned for December 2025.

### **SUSTAINABLE FINANCE ADVOCACY**

Promoted sustainable financing by encouraging a “race-to-the-top” among Ghanaian financial institutions.

### **ESG BANKING ASSESSMENTS**

Conducted ESG policy assessments of five banks in Ghana and engaged the Ghana Association of Banks to strengthen sustainability practices.

# OUR PROGRAMS

# CLIMATE CHANGE AND

# ENERGY TRANSITION

Africa has a unique opportunity to redefine its energy future. There is growing recognition of the economic and environmental imperatives for fossil fuel-dependent economies to transition toward cleaner and more sustainable energy systems. This shift is not only necessary for addressing climate change but also presents a strategic pathway to drive job creation, enhance energy security, and support long-term, inclusive development across the continent.

Clean energy technologies particularly solar, wind, and other renewables offer Africa the chance to leapfrog traditional energy systems and build more resilient and decentralized energy infrastructure. However, unlocking this potential requires deliberate policy action. Governments must prioritize aligning regulatory frameworks, de-risking investment environments, addressing structural and financing barriers, and fostering the development of local energy value chains that retain economic benefits within their economies.

At the Africa Centre for Energy Policy (ACEP), we have been at the forefront of advocating for and shaping this transition. Our work focuses on providing rigorous, evidence-based policy recommendations to governments and key stakeholders, enabling them to make informed decisions and fully harness the opportunities presented by the evolving global energy landscape.

A central pillar of ACEP's approach is challenging entrenched narratives that reinforce prolonged dependence on fossil fuels, particularly where such dependence undermines long-term sustainability and economic diversification. Instead, we promote a forward-looking vision of energy systems that are equitable, inclusive, and aligned with global climate and development goals.

In addition, ACEP emphasizes the importance of multi-stakeholder collaboration in driving the energy transition. This includes strengthening partnerships between governments, the private sector, development partners, civil society, and research institutions. Such collaboration is essential for mobilizing the capital, technology, and expertise needed to scale renewable energy deployment and unlock its full economic potential.

# CLIMATE CHANGE AND ENERGY TRANSITION

## KEY HIGHLIGHTS 2025

### REGIONAL METHANE TRAINING PROGRAMS

Organized major methane management training programs in Ghana, Angola, and Mozambique, building regional capacity.

### CLIMATE ACADEMY LAUNCH

Launched the Climate Academy and Summer School to deepen knowledge on methane management and climate solutions.

### METHANE NETWORK & FEC ENGAGEMENT

Participated in the Methane Training Network (MTN) and hosted methane-focused sessions at the Future of Energy Conference (FEC).

### EU METHANE REGULATION ADVOCACY

Contributed to discussions on the impact of EU methane regulations on Africa's oil and gas sector.

### REGIONAL CLIMATE KNOWLEDGE COLLABORATION

Collaborated with Lusophone EITI and CATF to strengthen regional climate and energy knowledge sharing.

### NDC 3.0 TECHNICAL CONTRIBUTIONS

Provided technical inputs into Ghana's NDC 3.0 and published two key articles on methane management.

### **CLIMATE SOLUTIONS PUBLICATION**

Edited a book on climate solutions, fostering evidence-based dialogue on energy transition.

### **CLEAN COOKING INNOVATION DIALOGUES**

Facilitated dialogues and a hackathon on clean cooking, promoting inclusive climate-smart energy solutions.

### **CRITICAL MINERALS POLICY RESEARCH**

Conducted stocktaking and policy scans on critical mineral governance, value addition, and localization strategies.

### **INCLUSIVE ENERGY CAPACITY BUILDING**

Engaged youth and women through targeted programs, building capacity for inclusive participation in the energy sector.

### **ENERGY TRANSITION POLITICAL ANALYSIS**

Applied the Political Settlements Framework to analyze political and economic influences on Africa's energy transition.

# OUR PROGRAMS

# DIVERSITY, EQUITY, AND

# INCLUSION IN RESOURCE

# GOVERNANCE

The extractive sector holds significant potential to drive inclusive growth and sustainable development. However, in practice, its benefits are often unevenly distributed. Women, youth, and persons with disabilities remain disproportionately excluded from the opportunities and wealth generated by the industry, while frequently bearing a greater share of its social, economic, and environmental costs. Addressing these imbalances requires a deliberate and sustained commitment to diversity, equity, and inclusion (DEI), ensuring that resource governance systems reflect the needs, priorities, and aspirations of all segments of society.

Inclusive resource governance goes beyond fairness, it is essential for building resilient and sustainable extractive economies. When governance frameworks actively incorporate the perspectives and participation of marginalized groups, decision-making processes become more representative, policies more responsive, and development outcomes more equitable. This not only enhances legitimacy and public trust but also reduces the risk of conflict and social fragmentation often associated with resource extraction.

our broader governance agenda. We advocate for policies and institutional practices that promote equitable access to opportunities within the extractive sector, including local content participation, employment, and capacity-building initiatives targeted at underrepresented groups. We also support greater transparency and citizen engagement to ensure that communities especially those directly affected by extractive activities have a voice in decisions that impact their livelihoods.

Embedding DEI principles within resource governance contributes to achieving shared prosperity while addressing longstanding structural inequalities. It fosters social cohesion, strengthens accountability, and ensures that the benefits of natural resources are distributed in a manner that is both just and sustainable. Ultimately, an inclusive approach to extractive sector governance is not only a moral imperative but also a strategic necessity for Africa's long-term development.

# DIVERSITY, EQUITY, AND INCLUSION IN RESOURCE GOVERNANCE

## KEY HIGHLIGHTS 2025

### YOUTH LEADERSHIP TRAINING

Trained 14 young Africans in ethical leadership and resource governance.

### CAMPUS GOVERNANCE HUBS LAUNCH

Launched Resource Governance Campus Hubs at UENR and UCC to strengthen youth engagement with a participation of about 360 participants.

### FISCAL ACCOUNTABILITY CHAMPIONS INITIATIVE

Established the Media and Youth Champions for Fiscal Accountability initiative, engaging approximately 200 participants

### YOUTH BUDGET POLICY CONTRIBUTIONS

Fellows of the youth champions for fiscal accountability contributed inputs into the 2026 Finance Ministry Budget and published post-budget analyses.

### RESOURCE WATCH GHANA SUPPORT

ACEP supported the creation of Resource Watch Ghana to engage young people on fiscal policy.

### GREEN ENERGY CAPACITY DEVELOPMENT

Launched the Green Energy Technology Capacity Development Program to foster an inclusive energy future.

### **WOMEN'S PETROLEUM REVENUE ENGAGEMENT**

Engaged over 100 market women on inclusive petroleum revenue management in collaboration with PIAC.

### **DISABILITY INCLUSION IN GOVERNANCE**

Enhanced participation of persons with visual impairments in governance processes.

### **COMMUNITY TRANSPARENCY ENGAGEMENT**

Enhanced transparency and understanding on the broader socioeconomic condition and expectations communities in Ewoyaa and its environs.

### **CBO GOVERNANCE CAPACITY BUILDING**

Built the capacity of CBOs to effectively engage households and other local agencies in governance processes.

**05**

# **CHALLENGES**

## STAKEHOLDER ENGAGEMENT CHALLENGES

Although ACEP has built a positive reputation in the civic space and among key stakeholders, engaging with some critical project stakeholders posed a challenge and conflicted with objectives and project outcomes. As most people's attention shifting onto political issues, it became challenging convening stakeholders on the most pressing issues bedeviling the country. In other African countries, although the political landscape was different, other activities conflicted with our efforts of meeting key stakeholders. However, this challenge did not ultimately decrease the successes choked for the year.

## MEDIA CAPACITY AND ADVOCACY CHALLENGES

The media is a critical partner and ally to what ACEP stands for and believe in therefore it is important for them to align and understand the advocacy efforts and the technicalities involved in ACEP's workstreams. Although significant progress has been made, the capacity of the media should significantly align with its advocacy efforts. In the year under review, the limited capacity of the media in their advocacy efforts.

## CHALLENGES IN SOURCING INFORMATION FROM GOVERNMENT RECORDS

Although we have a RTI bill passed, access to information from government institutions isn't believed that the country support Civil society activities, but ACEP faces challenges with accurate information or any information at all on government activities or contracts. This challenge raises difficulties in undertaking accurate research and subsequent advocacy.

## Tracking Ghana's Path to Debt Sustainability

Issue 2 (April 1, 2024 – April 30, 2025)

The IMF's Debt Sustainability Analysis, conducted before Ghana's 17th Programme with the Fund, revealed that the country was in debt distress with a medium debt-carrying capacity. This underscored the need for Ghana to reassess its fiscal management, particularly towards the resolution of its governance and institutional inefficiencies. The energy sector, a major driver of Ghana's economic challenges, required urgent reform to ensure fiscal and macroeconomic stability and prevent a relapse into debt distress.

Over a year after the approval of the IMF Extended Credit Facility (ECF), Ghana has made progress in its debt restructuring efforts, both domestically and externally. The approval of a fourth tranche this year under the ECF brings total disbursements to \$2.36 billion. However, while these measures provide temporary relief, lasting debt sustainability depends on addressing deep-rooted governance challenges.
